Experience

Senior Frontend Developer

GivingData/Foundant, Remote

December 2024 - Present

- Led a team of 4 developers, providing mentorship, technical guidance, task assignment, and code reviews.
- Migrated legacy AngularJS features and pages to React, modernizing the frontend and improving maintainability.
- Built a React-based CMS that enabled users to create custom applications and forms for other users to complete.
- Built and maintained a shared component library following CGAG guidelines and established frontend standards.
- Developed and integrated C#/.NET API endpoints, extending NHibernate and SQL queries to support new data fields and application functionality.
- Integrated agentic AI tools into development workflows to improve productivity and assist with planning, building, and reviewing code.

Senior Software Engineer

STR/Costar Group, Nashville, TN

March 2021 - December 2022 and February 2023 - December 2024

- Developed and maintained an enterprise level data analytics application from the ground up utilizing technologies such as React, Apollo GraphQL, Typescript, Node.js, and various libraries for testing and styling.
- Promoted from Associate Software Engineer to Senior Software Engineer within three years.
- Assisted in fixing bugs and building new features of a report download tool built in C# with a .NET framework.
- Established and architected patterns for websocket connection to deliver real time messaging to clients using AWS API Gateway, SQS, DynamoDB and Lambdas in Node.js.
- Designed, built and exhibited generic React components to be reused by 5+ various front end teams.

- Improved performance through refactoring, memoization, and restructuring api calls; ultimately reducing render times, response times and latency by over 50%.
- Conducted dozens of live demos to the 100+ person IT department, showcasing technical proficiency of work accomplished in a given sprint.
- Mentored four team members in the adoption of new technologies such as Apollo GraphQL and Typescript, while also influencing high-level decisions for architecture designs and patterns..

Software Engineer

SOLTECH, Nashville, TN

December 2022 - February 2023

- Architected, designed and built a marketing application from scratch using React, Redux, Apollo GraphQL, Typescript, Next.js, and Chakra-UI.
- Contributed to the development of application architecture for both frontend and backend, ensuring scalability and efficiency.
- Designed and implemented responsive UI for seamless user experiences across various devices.

Centralized Grader (Part-time)

Trilogy Education, Nashville, TN

June 2020 - April 2022

- Assessed and provided feedback on assignments and applications for the Trilogy Full Stack Web Development Bootcamp.
- Evaluated and critiqued over 2,000 assignments, offering constructive feedback and debugging assistance.

Front End Web Developer

HCA Healthcare, Nashville, TN

November 2019 - March 2021

- Utilized HTML, CSS, Bootstrap, Javascript, and dotCMS to create, revise, and publish websites for over 500 HCA-owned practices.
 - Independently conceived and launched more than 100 websites, showcasing creativity and proficiency.
 - Developed and maintained COVID-19 emergency alerts, effectively disseminating critical information to a broad audience.
-

Technical Skills

HTML, CSS, Javascript, Typescript, React, Tailwind, Next.js, C#, .NET, Apollo GraphQL, Node.js, DynamoDB, AWS API Gateway, Git, AG-Grid and styling libraries such as React-Aria, Material-UI and Bootstrap.
